Personal Summary

I'm a full-stack software developer with a knowledge of a wide range of tools and development philosophies. I have a wide breadth of experience in designing creative digital solutions to problems presented, as well as being an effective member of any team. I have created several front-end applications as well as the associated business logic powering them for my team. Versatile as a result of having both back-end and front-end development experience, creative, experienced in design, and adept at client-developer interaction, I am motivated and capable of being an effective member of any software development team.

Education:_____

| University of Nebraska - Lincoln | **Graduated:** August 2016 |
| Bachelor of Science | **GPA:** 3.7 |

Majors: Computer Science, History, Classics
